HOW TO GET IT

ACKNOWLEDGEMENTS

We are indebted to the military librarians and information resource personnel around the country and in Europe who contributed valuable information for this revision. We are also indebted to the originating offices and distribution agencies, which cooperated by verifying and updating data about their documents and services.

The work reported in this document was compiled and updated by the Defense Technical Information Center. The publication of this guide does not indicate endorsement by the Department of Defense, nor should the contents be construed as reflecting the official position of that agency.

Nancy D. Wright
Director
Directorate of User Services

HOW TO GET IT

INTRODUCTION

Background

A Directory that would identify sources and channels for the acquisition of types of government-published or government-sponsored documents of interest to the Defense community was conceptualized in the early 1970's by the Committee on Information Hang-ups' Subcommittee on Document Procurement. It was based on the recurring problem that documents which were not indexed, announced or distributed by the major government information services were difficult to locate, and searches by letter and telephone were time consuming and not always successful. No directory existed, except in the minds of experienced librarians and information specialists and in their working notes accumulated during years of experience.

The guide, first published in 1973, was well received by the Defense information services community. This Librarians' Edition is the sixth revision.

Purpose

The guide is intended to assist librarians and information specialists as well as other individuals who need to identify or acquire Government-published, Government-sponsored, or Defense-related information resources.

Scope

The contents are limited to technical documents and information resources prepared for or of particular interest to the Department of Defense and its contractors (or potential contractors).

Information was gathered from written and Internet sources, such as the official regulations, directives and instructions which establish the formal, preferred channels for acquiring these documents, and from telephone calls, fax, e-mail and traditional correspondence. Information on maps, patents, translations and databases is included. The inclusion of URL's for Internet locations of sources are used whenever they are known.

Arrangement

Individual entries are arranged alphabetically in a dictionary type list. Each entry consists of an identification of the items and the following information whenever available:

Originator: The agency that produces or sponsors that type of information resource.

Order from: Sources from which the item may be ordered, with notations indicating who may order from those sources.

Forms: Forms that should be used to order from each source cited.

Cost: Where there is a charge, the word "yes" is entered ; where there is no known charge the word "no" is entered.

HOW TO GET IT

Telephone: Telephone numbers, fax numbers, and e-mail addresses of offices from which the item may be ordered, or from which additional information can be obtained.

E-Mail: E-Mail for a designated point of contact, Webmaster, Customer Service Department or Order Department of the particular agency or information source.

Restrictions: Any restrictions on the distribution or use of the item, including who may order it.

Indexed In: Publications in which that type of information resource is indexed.

Notes: Comments on the history, status, or content of the information resource.

URL: Uniform Resource Locator: a protocol for specifying addresses on the Internet.

Contractor Reports

With some exceptions, contractor-generated reports are not included. The procedure for the acquisition of these reports is fairly standard. Most contractor reports are indexed and distributed by the Defense Technical Information Center (DTIC) and National Technical Information Service (NTIS). Reports not in DTIC or NTIS usually are controlled by the specific agency for which the contract work was performed. These reports must be requested from (or through) the controlling agency. That is, the request for the document, with need-to-know certified by the requester's contract monitor, must be sent to the office which controls distribution of the report. That office may transmit the report directly to the requester, or may direct the contractor to transmit the report. For additional information see the entries under Defense Technical Information Center (DTIC) and National Technical Information Service (NTIS).

Forms

In general, the forms used for ordering a specific type of document from DTIC, NTIS, or the Government Printing Office (GPO), are included. Agencies often will honor a document request submitted on other than the prescribed form.

Publications Centers

The Air Force, Army and Navy each maintain Publication Centers which are responsible for stocking and distributing publications produced by and of interest to the community they serve. For information on these centers see Appendix A.

The Defense Technical Information Center is the central repository, disseminator, and

HOW TO GET IT

referral center for the information needs of the Department of Defense (DoD) and its contractors. For more information see the entry under the Defense Technical Information Center and Appendix A.

The National Technical Information Service (NTIS) handles the announcement and sale of unclassified, unlimited documents available for general public distribution. For more information see the entry under the National Technical Information Service.

Other Government publications centers announce and distribute documents, many of which are of interest to the Defense community. For examples, see Appendix A.

Corrections and Updates

The Department of Defense has undergone numerous reorganizations and consolidations. These changes have had a major impact on the revision and updating of the HOW TO GET IT. Inevitably the organizations are experiencing a loss of institutional memory. Often knowledge of what happened to the publications of a former organization or where to go for information on the newly formed organization is very difficult to obtain.

Consequently, the editing of the HOW TO GET IT is a work in progress. We are depending on the users of this document to help us correct and update information. There are some gaps and inaccuracies in the data. We have included incomplete entries in the belief that some information is better than none. DTIC would appreciate receiving corrections and new information to be included in the next revision.

Your input, comments, updates and criticisms are welcome at Htgi@dtic.mil. We will investigate errors and will post the new information on the Web version.

HOW TO GET IT

AFIND Air Force Index

Notes: Formerly called Air Force Regulations (AFR)

AFIND10 Management Control and Authorization Program for Tables of Allowance and Allowance Source Codes for USAF Activities (Rescinded 3/97)

AFIND11 Index of Readiness and Disaster Preparedness Training Packages (Rescinded 6/99)

AFIND12 Functional Index of Departmental Forms (Rescinded)

AFIND13 Civilian Personnel Publications

Originator: Department of the Air Force
HQ USAF/DPC ATTN: SAF/AAD
1720 Pentagon
Washington, DC 20330-5000

Order from: U. S. Air Force Publishing Agency (USAFPA) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Notes: Formerly AFR 0-13. This regulation lists Department of Defense, United States Civil Service Commission, and other publications applicable to Air Force civilian personnel.

URL: <http://afpubs.hq.af.mil/>

AFIND14 Engineering and Miscellaneous Federal and Commercial Publications (Rescinded)

AFIND15 Numerical Index of Specialized USAF Intelligence (USAINTEL) Publications (Rescinded)

AFIND16 Engineering Technical Letters (ETL) (Rescinded)

AFIND17 Index of Air Force Occupational Safety and Health (AFOSH)

Originator: Department of the Air Force
Air Force Safety Agency/SEG AFSC/SEG
9700 G Avenue, S.E.
Kirtland AFB, NM 87117-5670

Order from: U. S. Air Force Publishing Agency (USAFPA) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

HOW TO GET IT

AFIND17 Index of Air Force Occupational Safety and Health (AFOSH)....Continued

Notes: Formerly AFR 0-17. AFIND17 identifies the Air Force Occupational Safety & Health (AFOSH), Dept of Labor (DOL), Occupational, Safety and Health Administration (OSHA), and National Institutes for Occupational Safety & Health Administration (NIOSH) publications and how they can be located.

URL: <http://afpubs.hq.af.mil/>

AFIND18 Index of Air Force Manpower Standards (AFMS)

Originator: Department of the Air Force
Directorate of Manpower and Organization AFMIA
Washington, DC 20330

Order from: U. S. Air Force Publishing Agency Center (USAFA) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Notes: Formerly AFR 0-18

URL: <http://afpubs.hq.af.mil/>

AFIND19 Air Force Energy Program Policy (Memorandum) (AFEPPM) (Rescinded)

AFIND2 Numerical Index of Standard and Recurring Air Force Publications

Originator: AFDPO/PP
200 McChord Street Box 94
Bolling AFB
Washington, DC 20332-1111

Telephone: 202-404-2438; DSN: 754-2438

E-Mail: e-Publishing@pentagon.af.mil

Notes: Formerly AFR 0-2 This index is a user reference of standard departmental publications. The last Air Force Index 2 was published 1 September 1999. Beginning 1 October 1999, all publication have been listed in a Master Catalog on Web site. Included are: AFMAM Air Force Manuals Formerly AFM AFPAM Air Force Pamphlets Formerly AFP AFI Air Force Instructions, Manuals & Pamphlets. Formerly AFR Air Force Regulations AFRP Air Force Recurring Publications AFVA Air Force Visual Aids

URL: http://afpubs.hq.af.mil/mastercatalog/master_catalog.asp

AFIND20 Numerical Index of Standard and Recurring Air Force Publications (Rescinded)

HOW TO GET IT

AFIND25 Index of Air Traffic Control Training Publications

Originator: HQ Air Force Flight Standards Agency
AFFSA/XAO
1535 Command Drive Suite D-306
Andrews AFB, Maryland 20762-7002

Order from: U.S. Air Force Publications Distribution Center (USAFPDC) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Restrictions: Submit F requirements and/or requisitions through a service Publishing Distribution Office (PDO).

Indexed in: AFIND2

Notes: This index is a reference document and index of Air Traffic Control Training Publications, established in accordance with AFI 36-2222, Air Traffic Control Training Publications.

URL: <http://afpubs.hq.af.mil>

URL: <http://www.andrews.af.mil/tenants/affsa/affsa.htm>

AFIND26 Index of Air Force Blood Program Technical Memorandums (AFBPTM)

Originator: U. S. Air Force Surgeon General
HQ USAF/SGXR Medical Readiness Division
110 Luke Avenue, Room 400
Bolling AFB, DC 20332-7050

Order from: Originator

Restrictions: Not available through normal distribution channels. HQ USAF/SGXR distributes to all MAJCOM's for addition of any command specific implementation. Medical Treatment Facilities should request added copies.

Indexed in: AFIND2

Notes: Replaces AFIND 26, 1 January 1993. Electronic index as of 1 January 1999. This index is a catalog of AFBPTM's, publications applicable to all established blood programs on Air Force installations.

URL: <http://afpubs.hq.af.mil>

AFIND27 Numerical Index of Air Force Computer Systems Manuals

Originator: Headquarters Standard Systems Group
HQ SSG/SWC
201 E. Moore Drive
Maxwell AFB Gunter Annex, AL 36114-3005

HOW TO GET IT

AFIND27 Numerical Index of Air Force Computer Systems Manuals....Continued

Order from: U.S. Air Force Publications Distribution Center (USAFPDC) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Indexed in: AFIND2

Notes: Index of AF computer systems manuals prescribed by AF Instruction (AFI) 33-122.

URL: <http://afpubs.hq.af.mil>

AFIND28 Numerical Index of Air Force Maintenance Quality Control Checksheets (AFMQCC) and Communications-electronics Maintenance Instructions (AFCEMI)

Originator: U.S. Air Force Communications Agency
HQ AFCA/GCSM
ATTN: FFMQCC/AFCEMI, Project Manager
203 West Losey Street Room 3065
Scott AFB, IL 62225-5234

Order from: Distributed on the Web site: http://www.afca.safb.af.mil/c-e_maint/

Indexed in: AFIND2

Notes: Specific AFMQCC and AFCEMI guidance published in AFI 21-116, attachments 2 and 3 respectively.

AFIND4 Department of Defense, Chairman Joint Chiefs of Staff (JCS) and the Joint Staff, Interservice Publications, Combined Publications, Air Force Contract Requirements Documents (AFCRD), and Miscellaneous Federal Government and Commercial Publications

Originator: Department of the Air Force
ATTN: SAF/AADDQ
1720 Pentagon
Washington, DC 20332-5000

Order from: U. S. Air Force Publishing Agency (USAFPA) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Indexed in: AFIND11

Notes: Formerly AFR 0-4. Lists DOD, JCS, and interservice publications directives of interest to the Air Force, excepting Department of Defense Directives and Department of Defense Instructions. (For information on these, see AFIND5) It also includes Air Force Acquisition Documents (AFAD).

URL: <http://afpubs.hq.af.mil/>

HOW TO GET IT

AFIND5 Numerical Index of Specialized Information Protection Assurance Publications

Originator: HQ, AFCS/GCIS
203 W. Losey Street Room 2040
Scott Air Force Base, IL 62225-5234

Order from: U. S. Air Force Publishing Agency (USAFPA) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Notes: Now known as Air Force Index 5. Formerly AFR 0-5. This indexes Air Force Manpower Standards (AFMS).

URL: <http://afpubs.hq.af.mil/>

AFIND7 Index of Air Force Personnel Tests

Originator: Department of the Air Force
AFPC/DPPAT Director of Personnel Programs
Washington, DC 20330

Order from: U. S. Air Force Publishing Agency (USAFPA) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Restrictions: Only available to Test Control Officers (TCO) & Test Examiners (TE)

Notes: Formerly AFR 0-7. This indexes Air Force Personnel Tests (AFPT). The AFPT number and date, requisition cod, TCO, Acct number, number of copies must be included. See Web site for complete ordering instructions.

URL: <http://afpubs.hq.af.mil/>

AFIND8 Numerical Index of Specialized Education/Training Publications

Originator: Department of the Air Force
2 AF/DOT 7
21 Hangar Road, Ste 102
Keesler AFB, MS 39534-2804

Directorate of Departmental Publishing
Distribution Management Office
Bolling AFB
Washington, DC 20330-1111

Order from: U. S. Air Force Publishing Agency (USAFPA) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Notes: Formerly AFR 0-8. This indexes Air Force Specialty Training Standards (STS).

HOW TO GET IT

AGRICOLA

Originator: Department of Agriculture
National Agricultural Library
10301 Baltimore Avenue
Beltsville, MD 20705

Cost: No

Telephone: National Agricultural Library: (301) 504-5755
Computer Services: (301) 504-5018

E-Mail: ag98help@nal.usda.gov

Restrictions: The AGRICOLA data are for personal use only. Users are responsible for complying with all copyright and licensing restrictions associated with data.

Notes: AGRICOLA (Agricultural Online Access) is a bibliographic database of citations to the agricultural literature created by the National Agricultural Library and its cooperators. Production of these records in electronic form began in 1970, but the database covers materials in all formats, including printed works from the 15th century. It is organized into two data sets, which must be searched separately. One set is the Online Public Access Catalog; the other is the Journal Article Citation Index. When fully loaded AGRICOLA will contain more than 3.5 million records.

Restrictions: Except for documents that are classified or otherwise restricted, the Agency's collection is open to the public.

Notes: The USAF Historical Research Center, collocated with the Air University Library at Maxwell Air Force Base, is a principal repository for Air Force historical documents. The Agency's holdings, exceeding 65 million pages, represent the largest and most valuable specialized collection of historical documents on U. S. military aviation in the world. Materials range from the use of balloons in the Civil War through the record of Air Force

HOW TO GET IT

Air Force Historical Research Agency....Continued

activities in World War II, Korea, Vietnam, Operations DESERT SHIELD/DESERT STORM, and NATO Operations in Kosovo. About three-fourths of the Agency's documents are U. S. Air Force unit histories submitted from 1942 to the present. Special collections, some dating from the early 1900's complement the unit histories. Among them are historical monographs and studies written by Air Force historians; more than 2,000 oral history interviews; end-of-tour reports of major overseas commanders, course materials of the Air Corps Tactical School from the 1930's; and working papers of key Army Air Forces staff offices, the British Air Ministry and German Air Force during World War II. More than 500 collections of personal papers of key, retired Air Force civilian and military officials are also available to researchers.

Air Force Publications....Continued

Restrictions: Customer accounts must be established with the Air Force Publications Distribution Office (PDO).

Notes: Requirements for publications must be determined at the local level by the CAR (Customer Account Representative) and submitted to the local PDO. Contractors requiring publications in conjunction with Government contracts should submit requests to the Air Force or other government officials responsible for administering contracts.

URL: <http://afpubs.hq.af.mil>

Air Force Publications Distribution Center (USAFPDC)

See: Air Force Publishing Agency (USAPA)

Air Force Publishing Agency (USAFPA)

Order from: Each Air Force organization has a local Publications Distribution Office (PDO) through whom documents is acquired from the AFPDC. There is also a category of PDO, which is not under Air Force control (for example, one assigned to the Army, the State Department or other government agency). Air Force Regulation AF137-61 (Receiving, Distributing, Requisitioning and Warehousing Publications and Forms) explains the relationship between the PDO and AFPDC. At the office level is the Customer Account Representative (CAR) who processes all requests to the PDO. This responsibility may be assigned to an individual or a local library. Air Force Regulation AF137-61 (Procedural Guide for Customers of the Publication Distribution Office) describes the CAR's interaction with the PDO. Together they describe how the system works. Other DOD and U. S. Government agencies that have a continuing need for Air Force publications should register with the Publications Distribution Center for Distribution Codes. Assignment of a Distribution Code makes an agency eligible to order from the Distribution Center. The Air Force Publishing Agency stocks and distributes publications produced by Air Force Headquarters, AF Forms, some DD Forms, some DOD Administrative Publications and other publications of interest to the Air Force.

Telephone: (410) 687-3330; DSN: 584-4829

E-Mail: afpdc-service@pentagon.af.mil

Notes: Formerly called Air Force Publications Distribution Center. Government agencies may request small quantities of Air Force publications from the nearest PDO.

American Forces Radio and Television Service (AFRTS) Broadcast Center

Originator: AFRTS Broadcast Center
1363 Z Street, Building 2730
March Air Reserve Base, CA 92518-2017

HOW TO GET IT

American Forces Radio and Television Service (AFRTS) BroadcastContinued

Order from: Originator
Telephone: (909) 413-2236; DSN 348-1236
E-Mail: affrel@dodmedia.osd.mil

Notes: The American Forces Radio and Television Service Broadcast Center transmits a variety of news, information, entertainment, and sports programming from all the major networks, twenty-four hours a day. Military and civilian broadcasting personnel staff the operation located at March Air Reserve Base near Riverside, California. The center is the sole programming source for military radio and television outlets overseas. These outlets serve American service men and women, Department of Defense civilians, and their families stationed in more than 175 countries around the world where English language broadcast service is unavailable or inadequate. Known as AFRTS-BC, the Broadcast Center is responsible for reflecting an accurate cross-section of what is widely available to stateside audiences of the American radio and television industry. Programs are up linked from the Broadcast Center to a series of satellites and delivered worldwide via a secure transmission path using MPEG-2 digital compression technology. This global radio and television network service is called AFN, the American Forces Network.

HOW TO GET IT

ATI-xxx xx Air Technical Information/Index Documents....Continued

Restrictions: Classified reports available to DTIC registered users only. Call or write DTIC for information.

Notes: The ATI collection of technical information developed during and immediately after World War II includes copies and translations of confiscated German and Japanese wartime research reports; however, the majority are shared British and U. S. research and development reports. The accession numbers range from ATI-000 001 to ATI-210 999. This collection was announced between 1947 and 1953 in a series of index file cards and catalogs (made up of the 3x5 cards reproduced on 8 1/2 x 11 sheets of paper) published by the Central Air Documents Office (CADO) and long out of print. The only retrieval technique currently available for these documents is a manual search of the closed card catalog at DTIC. File categories are: master accession number, author, CADO subject heading, corporate source and contract number. Searches for documents in this file are only made in response to a specific user request on a special service basis. Some of the unclassified ATI-numbered documents are also held in the collections of the Library of Congress and the National Archives.

BMD Information Resource Center (BIRC)

Originator: Ballistic Missile Defense Organization
7100 Defense Pentagon (FOB2, BIRC, Rm.G810)
Washington, D.C. 20301-7100

Telephone: (703) 697-8855; Fax: (703) 695-9768

E-Mail: birc@bmdo.osd.mil

Restrictions: Access to classified information requires a Visit Authorization Request (VAR).

Notes: The BMD Information Resource Center (BIRC) provides the BMD community with the scientific and technical information required to support the mission. The BIRC's community of users includes BMDO staff and their contractors, as well as the staff and contractors of any other defense organization with a missile defense component. Technical Reports numbering about 40,000 - both classified and unclassified - form the largest part of the BIRC's collection. Besides those documents originated by BMDO, the collection includes reports from the military services, other defense agencies, Federal research laboratories and defense data centers. The BIRC also offers a small book collection focused entirely on missile defense technologies, nuclear deterrence and international relations. The BIRC uploads all BMDO documents on their Web site.

HOW TO GET IT

Business Identification Number Cross-reference System (BINCS)....Continued

Notes: The CAGE SEARCH has been replaced with a new improved version - Business Industry Number Cross-reference System (BINCS). BINCS is a search engine of manufacturers and suppliers. Information in this system is cross-referenced to permit inquiry by CAGE, DUNS, UPC, Company Name, Phone Number, SIC Code and ZIP code. Information about the supplier is returned from the CAGE File, The CCR File, The Joint US/Canada Certification Program and UPC data from the Universal Directory of Commercial Items (UDCI). BINCS provides linkages to each of these source systems for an expanded view of the trading partner's profile.

Chemical Propulsion Information Agency (CPIA)

See Also: Information Analysis Centers (IAC)

Originator: The Johns Hopkins University
Chemical Propulsion Information Agency
10630 Little Patuxent Parkway, Suite 202
Columbia, MD 21044-3200

Order from: Originator

Cost: Yes

Telephone: Technical Inquiries (410) 992-7300 Fax: (401) 730-4969

E-Mail: cpia@jhu.edu

Notes: The subject matter within the scope of CPIA operations includes rocket motor, rocket engines, missile air breathing propulsion systems, electric space propulsion systems, guns, gas generators, energetic and inert components, materials, fuels, and ingredients. Technical areas of interest include chemical synthesis; thermochemistry; combustion phenomena; physical, chemical and mechanical properties of propellants and fuels; manufacturing process development, special test equipment and techniques; theoretical performance computations; analytical test techniques; propulsion units and component design; nondestructive evaluation; operational serviceability; life cycle costs; reliability; environmental protection; exhaust plume technology; interior ballistics; materials areas specifically related to missile, space and gun propulsion; and the evaluation of hazards and safety measures related to these areas. CPIA also provides administrative and technical support to the Joint Army-Navy-NASA-Air Force (JANNAF) Interagency Propulsion Committee. All CPIA products and services are available under a blanket service charge to the JANNAF agencies. Other DOD, NASA, and military service agencies, as well as their contractors may purchase CPIA products and services through a customized subscription plan.

E-Mail: cbiac@battelle.org

Notes: CBIAC was established in August 1986 to serve as the DOD focal point for Chemical Warfare/Chemical Biological Defense (CW/CBD) technology. It is responsible for the collection, review, analysis, appraisal and summary of available CW/CBD information and data and providing these data to all interested users in support of the DOD CW/CBD research and development program. To do this, CBIAC has developed and maintains several databases and has access to a number of other CW/CBD databases. CBIAC is concerned with all areas of CW/CBD technology and provides technological assistance in such areas as: Chemical and physical properties of agents, decontaminants, simulants and intermediates Identification of Chemical Biological and Radiological (CBR) agents, simulants and other materials that may be encountered in the environment. Environmental transport and fate of agents and simulants. Medical effects, treatment, prophylaxis and equipment/procedures Toxicology of agents and related materials Warning and identification Treaty verification including technology assessments, process identification and methodology Individual and collective protection Decontamination NBC survivability of personnel and equipment Materials properties Combat effectiveness Munitions capabilities Smoke and obscurants Domestic Preparedness against attacks by CB weapons of mass destruction

CRREL (603) 646-4100; Fax: (603) 646-4712
LC (202) 707-1181

Notes: This bibliography superseded the Annotated Bibliography on Snow, Ice and Permafrost in 1969. New accessions to the database are available electronically on a monthly basis and may be viewed and searched on the website of the U.S. Army Cold Regions Research and Engineering Laboratory (CRREL) Library--one of the sponsors of this project. Antarctic items are available as Current Antarctic Literature (CAL); CRREL items are available as Current Literature--Cold Regions Science and Technology. You may view these monthly accessions on the CRREL Library Home Page. The monthly accessions are no longer printed and mailed because the electronic version can be searched and is now available to the entire public, faster, and at a lower cost. The annual compilation of new accessions for the period October 1998-September 1999 was published as the Bibliography on Cold Regions Science and Technology, vol. 53, Parts 1 and 2. It may be ordered from the National Technical Information Service, Springfield, VA 22151. CRREL also publishes five-year cumulative Subject and Author Indexes of its annual volumes.

(757) 864-5047 NASA
(703) 767-9100 DTIC
(703) 648-4090 Department of Interior (USGS/Biological Resources Division)

Notes: The agencies have formed a cooperative organization called CENDI to develop ways to improve the productivity of federal research and development through efficient and responsive information programs and improved management systems. Since information is a critical need in the research process, each of the agencies is actively involved in gathering and processing information from research by others, including foreign information obtained through international exchange agreements to supplement the information generated by its own research activities. The collected information is of interest not only to researchers within the federal government but also to U. S. industry, colleges and universities, nonprofit organizations and state and local government agencies. CENDI's programs are conducted by working groups on cataloging standards, electronic networking, user education, and international scientific and technical information activities. Special projects cover topics such as development of Standard Technical Report Numbers (STRN), development of common authority lists coordination of classification and sensitive information marking, development of information transfer standards, and promotion of cost-benefit studies.

Originator: OneSource Information Services, Inc.
300 Baker Avenue
Concord, MA 01742

Order from: Originator

Cost: Yes

Telephone: 1-800-554-5501, (978) 318-4300; FAX: 978-318-4690

E-Mail: sales@onesource.com

Restrictions: None

Notes: OneSource Information Services, Inc., Concord, MA, acquired CorpTech (Corporate Technology Information Services, Inc.) in October 1999. OneSource continues to sell CorpTech national and regional products on CD-ROM and in ASCII formats; however the print versions of the CorpTech Directory of Technology Companies and Regional Technology Guides are no longer available. The CorpTech database is now being marketed as OneSource CorpTech Profiles. It covers over 50,000 U.S. high-tech companies and is available in two versions at the national and regional level. OneSource CorpTech Profiles on CD-ROM provide unlimited access to standard profiles on all listed companies. The profiles are fully searchable by more than thirty-three criteria, such as company name, location, products, URL, ownership, size, growth and many more. Users may also text search through product descriptions within profiles for pinpoint accuracy. Users have direct access links to company home pages and e-mail addresses using Netscape Navigator or Microsoft Internet Explorer.

E-mail: terry.czerniak@dtra.mil

Order from: Document Automation and Production Service (See Appendix A)

Cost: Yes

Forms: DD Form 1425
DD Form 1348 MILSTRIP

Restrictions: DIDs which are identified in the index as "Limited to (system)" in the column, identified with an "" and/or annotated with an "@" symbol are not available from DAPS. They must be obtained from the program office or office of primary responsibility (OPR) of the DID.

Indexed in: DOD 5010.12-L, (AMSDL) Acquisition Management Systems and Data Requirements Control List

Notes: List identifies those source documents and related Data Items Descriptions (DIDs) which have been cleared for use in defense contracts by the Office of Management and Budget (OMB) under the authority granted by Public Law 96-511, "Paperwork Reduction Act of 1980". Government agencies may request a complete set of DIDs by sending their request to DAPS. If more than one set is needed, the request must go via the requester to a Designated Service Focal Point (see DOD 5010.12-L, for a list of Focal Points). New and revised DIDs, the AMSDL and the AMSDL Notices are automatically distributed to government activities appearing on the automatic distribution list maintained at DAPS. New and revised issuances of DIDs, the AMSDL, and the AMSDL Notices are available by subscription to non-government activities. Prior to July 1985 DIDs were assigned to a functional category which most nearly describe the use of the required data, as follows:

- A - Administrative/Management
- E - Engineering and Configuration Documentation
- F - Financial
- H - Human Factors
- L - Logistic Support
- M - Technical Publications
- P - Procurement/Production
- R - Related Design Requirements
- S - System/Subsystem Analyses
- T - Test
- V - Provisioning

Beginning 1 July 1985, DIDs have been assigned identification numbers with a four-letter designator representing the functional area assignment, as outlined below:

- ADMN - Administrative Data
- ATTS - Automatic Test Technology Standards
- CDNC - Computer Aided Design/Numerical Control

HOW TO GET IT

Data Item Description (DID)...Continued

DTIC has monthly issues covering 1997 through the present. Search DROLS/WED on the title "DRIC Abstracts". DTIC will soon host an electronic version of DRIC Abstracts. It is unclassified, limited to DOD only (access restricted to .mil). The database will include citations created in 2000 and after.

Notes: On 02 Jul 01, the Defence Evaluation and Research Agency (DERA) split into 1) QinetiQ - a UK private contractor and 2) The Defence Science and Technology Laboratory (Dstl) - a new UK Ministry of Defence agency. Dstl Knowledge Services is DRIC's parent organization. The Defence Research Information Centre (DRIC) has more than 700,000 scientific and technical (S&T) reports dating back to the Second World War and is the UK focal point for the exchange of S&T defense reports with other countries. DRIC has been a valuable source of information to the defense community for 25 years, utilizing the resources and skills built up during the 75 years since its inception as Admiralty Technical Records.

Defense Federal Acquisition Regulation Supplement (DFARS)

Originator: The Department of Defense
Washington, DC

E-Mail: dfars@acq.osd.mil

Notes: The DFAR is a DOD Supplement of the FAR for internal DOD use. Effective March 8, 1978 the title of the basic manual changed from Armed Services Procurement Regulation (ASPR) to Defense Acquisition Regulation (DAR). At the same time, the titles of the circulars were changed from Defense Procurement Circular (DPC) to Defense Acquisition Circular (DAC). As a result of the Defense Reform Initiative, DFARS is no longer published on paper. Since the release, in October 1998, of the 1998 Edition of the DFARS, DACs or Departmental Letters are no longer published. Instead, the DFARS on the World Wide Web will be updated on a more frequent basis.

Defense Logistics Information Service (DLIS) Procedures Manual (DOD 4100.39M)

Originator: Defense Logistics Agency (DLA)
Defense Logistics Information Service
ATTN: DLSC VPE
74 North Washington Avenue
Federal Center
Battle Creek, MI 49017-3084

Order from: DLIS (See Appendix A for more complete ordering instructions)

Notes: OD 4100.39 consists of 17 volumes and changes. Supersedes Defense Integrated Data System (DIDS) Procedures Handbook. DIDS is a logistics management information system designed to receive, store, process and disclose item information and item-related logistics information. DOD 4100.39M describes procedures for development, submittal, coordination and maintenance of tools required to organize item logistics information. Included are Item Names and Federal Item Identification Guides (FIIGs), The Federal Supply Classification (FSC) system, and Department of Defense Ammunition Codes (DODACs). This is a hardcopy manual containing technical and administrative information relative to submittal of data for item naming, classification systems and maintenance of cataloging guidance required for input and process of Item Identification transaction.

Notes: Operates under the general guidance of DLA's J-67, Electronic Business Office (eBusiness) and the Under Secretary of Defense, (Acquisition, Technology, and Logistics (USD(AT&L)). Administrators the, Defense Logistics Standard System (DLSS) [formerly known as the Military Standard Logistics Systems (MILS)], the Defense Logistics Management System (DLMS), the DOD Physical Inventory Control Program, the Interfund Billing System (IBS), Customer Wait Time (CWT), and other designated standard logistics systems and programs for the DOD. In 1962, the DLSS were established to realize the advantages of advancing computer technology. They provide procedures for communicating requirements, moving material, and performing the other tasks that ensure the continuing operation of DOD's logistics system. The 13 DLSS and supporting Directories:

Acronym	Title (Publication)
DLMS	Defense Logistics Management System (DOD 4000.25-M)
MILSTRIP	Military Standard Requisitioning and Issue Procedures (DOD 4000.25-1-M)
MILSTAMP	Military Standard Transportation and Movement Procedures (DOD 4500.32-R)
MILSTRAP	Military Standard Transaction Reporting and Accounting Procedures (DOD 4000.25-2-M)
MILSTEP	Military Supply and Transportation Evaluation Procedures (DOD 4000.25-3-M)
SDR	MILSTEP SDR Reporting of Item and Packaging Discrepancies (RODS) DLAR 4140.55, AR 735-11-2, SECNAVINST 4355.18, AFR 400.54
MILSCAP	Military Standard Contract Administration Procedures (DOD 4000.25-5-M)
MILSBILLS	Military Standard Billing System (DOD 4000.25-7-M)
MILSPETS	Procedures for the Management of Petroleum Products (DOD 4140.25-M)
DODAAD	DOD Activity Address Directory (DOD 4000.25-6-M)
MAPAD	Military Assistance Program Address Directory (DOD 4000.25-8-M)
DAAS	Defense Automatic Addressing System (DOD 4000.25-10-M)
LODGESMAP	DOD Logistics Data Element Standardization and Management Program (DOD 4000.25-13-M)
ILCS	International Logistics Communications System (ILCS)

URL: <http://www.dla.mil/j-6/dlms0/Default.htm>

Defense Logistics Management System (DLMS) (DOD 4000.25-M)

Originator: JECPO/eBusiness
DLMSO (J-673) Suite 1834
8725 John J Kingman Rd
Fort Belvoir, VA 22060-6217

Notes: This manual consists of five volumes. It provides policy and uniforms procedures, and prescribes electronic data interchange standards for conducting DOD logistics business processes implemented under the Defense Logistics Management System. It is the linchpin of logistics systems standardization and modernization both for process and data interchange within the Department and with industry.

E-Mail: dvicserv@DODmedia.ods.mil

Notes: The Defense Visual Information Center (DVIC) is the official Department of Defense (DOD) records center for the storage and preservation of significant visual information (VI) material. The DVIC is responsible for the reception, selection, storage, retrieval, compilation, duplication and distribution of significant DOD imagery of military operations, exercises, and training to DOD units and activities in support of mission requirements. The DVIC also provides VI products and services to public customers for a cost recovery fee. The DVIC's records are a dynamic collection of still and motion imagery and a working depository where images are accessioned as they are submitted to DOD military departments and activities. DVIC's holdings consist of approximately 75 million feet of motion picture film and 500,000 minutes of original master video material. Major portions of the subject material are dated from 1982 although there may be historic subject pre WWII to the present. Copies of unclassified official image records are available to all DOD units and activities and maybe purchased by the public.

Department of Defense Index of Specifications and Standards (DODISS)

Originator: Department of Defense
Washington, DC

Order from: Government (DOD) only:
Document Automation and Production Service (DAPS) (See Appendix A)

All Others:
Government Printing Office (GPO) (See Appendix A)

Private Sector May also be ordered through channels in the military service.

Cost: Yes

Forms: GPO Order Form
Letter

Telephone: (215) 697-2667/2179

Indexed in: AFIND4
GPO Monthly Catalog
GPO Sales Product Catalog (SPC)

Notes: This index lists the unclassified Federal, Military and Departmental specifications, standards and related standardization documents, and those industry documents which have been adopted for DOD use. International standardization documents are included. It contains three listings:

Military Specifications and Standards; Federal Specifications and Standards; Military Handbooks; Qualified Producers Lists (QPL'S); Data Item Descriptions (DIDs); Commercial Item Description (CIDs); Air Force-Navy Aeronautical Standards; Air Force-Navy Aeronautical Design Standards; Air Force Specifications; Cancellation Lists and other Departmental Forms.

DODISS Part 1. An alpha listing of all current standardization documents in order by title. DODISS Part 2 A numerical listing of all current standardization documents in order by document identifier number plus all standardization documents canceled since the latest edition of DODISS Part IV.

DODISS Part 3. A Federal Supply Class (FSC) listing of all current standardization documents in alpha order within each FSC. FSC are identified in the Cataloging Handbook H2-1, which can be ordered at the subscription desk.

DODISS Part 5. A numerical listing of all standardization documents canceled from 1964 to date of current edition. This is published every three years.

Documents: (865) 576-8401 FAX: (865) 576-2865

Notes: DOE/OSTI was formerly called AEC/TIC and ERDA/TIC and DOE/TIC. DOE/OSTI services, including distribution of printed DOE reports, are available to DOE and its contractors. Limited services are available to state, local and federal agencies involved in energy activities. The Office of Scientific Technical Information is the Department of Energy's central point for: coordinating the establishment, communication and implementation of policy procedures, and standards for handling scientific and technical information in DOE. Report Handling, including collecting, processing, announcing and distributing technical reports of DOE-funded research. Energy Data Base Production, involving maintenance and enhancement of the Energy Data Base which is the world's most comprehensive collection of references to energy-related information, Energy Research in Progress, and other data base services. Information Retrieval. The Energy Data Base and other specialized databases are accessible by means of an online retrieval system (earlier called the Integrated Technical Information System (ITIS)) and through production and distribution of various printed products, including abstracts journals, specialized bibliographies and current awareness publications. (See Energy Data Base (EDB) for additional information on other means of accessing this database.)

Notes: The DODSSP mission was assumed by the Defense Automated Printing Service (DAPS) in October of 1990. DAPS, now known as Document Automation and Production Service, provides professional printing, copying, duplicating, scanning, imaging, document conversion, CD-ROM, and Web services to the Department of Defense and the Federal Executive Branch. DAPS manages over 50,000 office copiers and multifunction devices for its customers. DAPS has been performing digital document conversion since 1987. Prior to 1999, it converted over 100 million pages to digital formats and continues at an increasing pace of over 45 million pages per year. Currently, DAPS does only technical manuals, training manuals, engineering drawings, and contracts.

Notes: This Directive comes in three sections: Activity Address Code Sequence, FIP Code Sequence, and Civil Agency Address.

A DODAAC is a Department of Defense Activity Address Code which identifies each activity with a unique six digit (alpha/numeric) code. Your DODAAC is a uniform way to identify customers' organizations and addresses, and is used for shipping, tracking and billing purposes. No two codes are alike, and everyone who has an agreement or contract to receive, ship and/or have custody of government property on a regular basis must have one. For more information about DODAACs or to conduct on-line queries of the Department of Defense Activity Address Directory (DODAAD, where DODAAC information is stored, visit the Web

E-Mail: dacs@dtic.mil

Restrictions: None

Notes: ITT Industries Inc. purchased Kaman Sciences Corporation. DACS supports the development, testing, validation, transition and use of software engineering technology. DACS subject areas encompass software engineering methods, practices, techniques, tools, guides, and standards; acquisition management; Ada and other programming language techniques and methods; software life cycle development including requirements definition, design, coding, integration, testing and acceptance; software failures; test methodologies; software quality metrics and measurements; reliability and cost modeling; standards and guides for software development and maintenance; software engineering techniques and tools; and software technology research, improvements, and training. DACS serves as an authoritative source for state-of-the-art software information and provides technical support to the software community including software technology users, researchers, technologists, program and acquisition managers, and software developers in defense, industry, and academia. The DACS has been designated as the DOD Software Information Clearinghouse by the DOD Software Management Review Council. By contacting the DACS Clearinghouse, users can locate COTS software and reusable software to meet their functional needs; can identify best practices, policy, or standards; can identify other DOD users/organizations addressing similar issues; can locate the latest open source information on topics of interest; and can get software project management advice (size and cost estimation, measurement, project planning, risk management, etc.). By visiting the DACS Clearinghouse World Wide Web site, users can access the latest software technology information; locate DOD software standards; find a schedule of upcoming conferences and workshops; locate extensive measurement information and databases; find links to other DOD software entities and resources; review DACS technical reports, newsletters, and courses; gain access to the DACS searchable bibliographic/abstract information database of 90,000+ documents; and locate extensive web resources on selected DACS topics of interest.

DOD Directives and Instructions (DODD and DODI)

Originator: Department of Defense
Washington Headquarters Service
1155 Defense Pentagon
Washington, DC 20301-1155

Order from: DOD offices may pick up directives and instructions in the Pentagon, Room 3B960. Single copies may also be ordered: National Technical Information Service (NTIS)(See Appendix A)

HOW TO GET IT

DOD Directives and Instructions (DODD and DODI)...Continued

Cost: Yes

Forms: DD Form 1348 MILSTRIP
DD Form 1425
DD Form 1149

Telephone: (703) 601-4722; DSN 227-4722 Fax: (703) 614-8532

Restrictions: Classified directives and instructions must be ordered through channels with certification of need-to-know.

Indexed in: DOD Directives System Quarterly Index (DOD 5025.1-I)

Notes: The number series and subject categories available for automatic distribution are:

- 1000 Manpower, Personnel and Reserve
- 2000 International Programs
- 3000 Planning and Readiness
- 4000 Logistics and Resources
- 5000 General Administration
- 6000 Health and Medical
- 7000 Comptrollership
- DOD Directives System Quarterly Index

Navy activities and DOD activities having a need should cite the Navy instruction encompassing or implementing the DOD directive/instruction. If unknown, direct request to CNO OP 09B15, or phone DSN 225-4106 or 4108.

DTIC Research Summaries (RS) Database

See Also: DTIC and DTIC Defense RDT&E Online System (DROLS)

Originator: Defense Technical Information Center (DTIC)

Order from: Originator (See Appendix A)

Telephone: (703) 767-8031

Restrictions: Available to registered users only

Notes: Research Summaries (RS) was established to provide a rapid exchange of technical and management data describing ongoing DOD research and technology efforts at the Work Unit level and is an integral part of the management and conduct of DOD RDT&E programs. It provides summary descriptions of the technical content, performers, monitors, and funding sources of DOD research or technology efforts. Formerly known as Technical Effort and Management Systems (TEAMS) Database.

URL: <http://www.dtic.mil/dtic/submitting/rs.html>

DTIC Review

Originator: Defense Technical Information Center (DTIC)

Order from: Originator (See Appendix A)

Cost: Yes

Notes: The DTIC Review contains selected technical reports and a bibliography of other references. It provides a sampling of documents from our collection on a specific topic of current interest. The DTIC Review is available to DTIC registered user. It is a subscription product, which includes quarterly issues.

DTIC Shared Bibliographic Input Network (SBIN) (No Longer Published)

DTIC Small Business Innovation Research Program (SBIR)

Originator: Defense Technical Information Center (DTIC)

Order from: Defense Technical Information Center (DTIC) (See Appendix A)

Notes: The Department Defense (DOD) and its components (Army, Navy, Air Force, Defense Advanced Projects Research Agency, Defense Nuclear Agency, and the Strategic Defense Initiative Organization) encourage small business (R&D) firms (as designated by the Small Business Administration) to submit proposals based on the hundreds of topics outlined in the semi-annual DOD Small Business Innovation Research (SBIR) Program Solicitation. The DTIC SBIR Program provides technical information packages keyed to each of the topics in the DOD SBIR Program Solicitation.

Indexed in: Resources in Education (RIE) Educational Resources Information Center (ERIC) Database

Notes: Ed-xxx xxx is an accession number assigned to publications acquired, analyzed, announced and made available by ERIC. ERIC is a decentralized nationwide network of 16 subject-oriented Clearinghouses, located at nonprofit institutions, and three commercial contractors. Each Clearinghouse publishes its own bibliographies, reviews, and state-of-the-art studies, which are indexed in RIE and available from the ERIC Document Reproduction Service (EDRS). Approximately 92% of documents abstracted in ERIC are available from EDRS. The ERIC database contains journal articles and reports concerned with education and curriculum materials covering the subjects of communications, education, and information science. The database contains all the references in Current Index to Journals in Education, 1969+ and Resources in Education, 1966+.

Energy Science and Technology Database (EDB)....Continued

Notes: The Energy Science and Technology Database (EDB) is a multidisciplinary file containing worldwide references to basic and applied scientific and technical research literature. The information is collected for use by government managers, researchers at the national laboratories, and other research efforts sponsored by the U.S. Department of Energy, and the results of this research are transferred to the public. Abstracts are included for records from 1976 to the present. The EDB also contains the Nuclear Science Abstracts which is a comprehensive abstract and index collection to the international nuclear science and technology literature for the period 1948 through 1976. Subject categories used to classify the EDB database are defined in DOE/TIC-4584-R7 and the controlled vocabulary used to index the database is EDB Subject Thesaurus (DOE/TIC-7000-R7).

E-Mail: info@etde.org

Notes: ETDE, through its member countries, provides an extensive bibliographic database announcing published energy research and technology information. As an IEA Implementing Agreement, ETDE has four objectives regarding topics in energy research and technology. These objectives are to: Collect and exchange energy research and technology information through the creation and maintenance of a common database. Disseminate and promote the energy research and technology information managed by the Exchange Support IEA's strategic priorities and initiatives relevant to energy technology and R&D collaboration. Collaborate with other providers of energy research and technology information in order to avoid duplication of efforts. Publishes ETDE Update newsletter three times a year. The ETDE's Energy Database is available publicly via the World Wide Web as ETDEWEB, and in a number of formats through commercial online hosts and on CD-ROM products.

Federal Citizen Information Center

Originator: General Services Administration (GSA)
Washington, DC

Order from: Federal Citizen Information Center
National Technical Information Service (NTIS) (See Appendix A)

Telephone: Federal Citizen Information Center 1-800-688-9889
NTIS 1-800-553-6847

Notes: The Federal Citizen Information Center (formerly the Federal Consumer Information Center) is a single point of contact for people who have questions about Federal agencies, programs, and services. The FCIC currently responds to about 2 million calls per year via its

HOW TO GET IT

Federal Citizen Information Center....Continued

nationwide, toll-free number. Principal reference tool is the FCIC's own electronic database, which lists more than 100,000 points of contact (telephone numbers, addresses, and electronic access) by agency and subject. The database also includes the Catalog of Federal Domestic Assistance and many agency fact sheets. Printed periodicals include the Federal Register and the Code of Federal Regulations and printed agency materials such as the Consumer Action Handbook, the Budget of the United States Government, and agency telephone directories.

Federal Computer Products Center

Originator: Federal Government Agencies

Order from: National Technical Information Service (NTIS) (See Appendix A)

Cost: Yes

Forms: NTIS Order Form, Letter

Telephone: Sales Desk: 1-800-553-6847 or (703) 605-6000

Notes: The Federal Computer Products Center was established at NTIS to provide access to information in electronic formats. The current inventory of computer products includes more than 1,200 titles since 1990. These include datafiles, databases, and software on diskette, CD-ROM, and magnetic tape. Most of the Center's products are developed or sponsored by the federal government. However, NTIS does announce products developed by state governments and in a few cases by private sector organizations and distributed by NTIS.

Foreign Broadcast Information Service (FBIS) Daily Reports

Originator: Central Intelligence Agency (CIA)
Foreign Broadcast Information Service (FBIS)
Washington, DC 20505

Order from: Library of Congress (LC)
Photoduplication Service
101 Independence Avenue, SE
Washington, DC 20540

Cost: Yes

Forms: Letter

Telephone: LC (202) 707-5639

Restrictions: See Notes

Notes: Prior to 1946 these reports were issued by the U. S. Federal Communications Service. From January 1946 to February 21, 1947 they were issued by the Latin American, European, and Far Eastern Sections of the FBIS. These sections were subsequently united into one series in February 1947, known as the "White Cover" edition. There are occasional missing issues. Individual reels or years can be supplied in complete reels only. In addition to the above, a Daily Report Supplement was issued which was separately filmed for the years 1960-69, and which may be purchased on 10 reels. The Supplement for 1970 and following years have been filmed with the Daily Report. The "Area Editions" of the Daily Report as were initialed in February 1947, and the area sections of the "White Cover" edition were discontinued as separate series. After that time the Daily Reports appeared in two editions:

HOW TO GET IT

Foreign Broadcast Information Service (FBIS) Daily Reports....Continued

the unrestricted "White Cover" edition described above, and the "Area Editions" restricted to official use. The "Area Editions" are the basis for the parallel "White Cover" edition, and contain information omitted from the latter. The "Area Editions" initially appeared in four series, covering the Far East, Latin America, the Soviet Union, and the Near East, and has been released from restrictions for the period of Feb. 24, 1947 thru Jan. 3, 1952. Positive microfilm can be provided on 289 reels. Individual reels or dates are available in complete reels only. "Area Editions" for the period 1952 thru August 3, 1970, are still subject to State Department restrictions, and therefore are not available yet for filming. For the period August 4, 1970 thru December 30, 1973, the "Area Editions" have been released and filmed only for the areas of Communist China, Eastern Europe, and the Soviet Union. Positive microfilm is available as follows: Area Reels Communist China 10 Eastern Europe 15 Soviet Union 13 As of April 1, 1974, FBIS no longer issues the "White Cover" Edition and has divided the Area Edition into 8 series. The Daily Reports are no longer available from FBIS.

Government Information Locator Service (GILS)

See Also: DOD Resource Locator

Telephone: POC at DTIC (703) 767-8050; DSN 427-8050

Notes: GILS is a decentralized collection of servers and associated information services that is used by the public either directly or through intermediaries to find public information throughout the Federal Government. The GILS standard is recommended for use by Federal agencies in the development and establishment of information locators, information resources that identify other information resources, describes the information available in those resources, and provide assistance in how to obtain the information. GILS was approved as Federal Information Processing Standard 192 to create a uniform technical approach to providing information locator services to the public. The DOD Resource Locator (formerly the DefenseLINK Locator) is the Government Information Locator Service (GILS) for the Department of Defense information sources.

Government-Industry Data Exchange Program (GIDEP)

Originator: Government-Industry Data Exchange Program
P.O. Box 8000
Corona, CA 91718-8000

Order from: Originator

Telephone: (909) 273-4677; Fax: (909) 273-5200

Notes: GIDEP is a cooperative by government and industry to exchange research, development, design, testing, acquisition and logistics information among government and industry participants. GIDEP's object is to avoid unplanned expenditures of time, manpower and money. GIDEP is chartered by the Joint Logistics Commanders (JLCs) and by agreement the Navy is assigned executive management of the Program. The Program Manager, located in the Office of the Assistant Secretary of Navy, Research, Development and Acquisition, Office of Acquisition Business Management [OASN(RDA)ABM], exercises overall executive authority over the planning and management of the Program. GIDEP participating organizations includes all department of the Department of Defense, Department of Commerce, Department of Transportation, Department of Energy, Federal Aviation Administration, Defense Logistics Agency, General Administration Services, U. S. Postal Service, National Institute of Standards and Technology, and the National Aeronautics and Space Administration. The Canadian Department of Defence and the Canadian industrial contractors are members. There are also thousands of industrial partners which supply goods and services to federal, state and local governments. Participants have electronic access to the following data: Engineering Data. Failure

HOW TO GET IT

Government-Industry Data Exchange Program (GIDEP)....Continued

Experience Data. Metrology Data. Product Information Data. Reliability and Maintainability Data In addition, the Urgent Data Request (UDR) is a service provided to GIDEP participants. UDRs permit participants to query to GIDEP community concerning a specific problem to determine if the scientific and engineering may have solutions or recommendations. UDRs are circulated electronically and may be commented on by any user of the GIDEP system. Responses and comments may be read directly on-line by the submitter or users of the GIPEP system. Membership requirements: Membership is voluntary, unless there is a specific statement of work (SOW) in your contract. In order to obtain membership your company must have access to the World Wide Web (WWW). Your organization must be willing to share documents prepared for your customers for Internet consumption. New reports are necessary from our participants to maintain constant renewal of the database. Your representative must also coordinate and submit at least one Annual Utilization Report per year. There are no fees for participation.

GPO Access

Notes: GPO Access is a service of the U. S. Government Printing Office that provides free electronic access to a wealth of important information products produced by the Federal Government. The information provided from GPO Access can be used without restriction, unless specifically noted. This free service is funded by the Federal Depository Library Program and has grown out of Public Law 103-40, known as the Government Printing Office Electronic Information Enhancement Act of 1993. The site includes such databases as the Federal Register, the Congressional Record, the Code of Federal Regulations, and the Commerce Business Daily.

HOW TO GET IT

Guide to Selected National Environmental Statistics in the U. S. Government

Originator: Office of Policy, Planning, and Evaluation
Center for Environmental Information Statistics
U. S. Environmental Protection Agency (PM-2161)
1200 Pennsylvania Ave. NW
Washington, DC 20460

Order from: National Service Center for Environmental Publications (NSCEP)
PO Box 42419
Cincinnati, OH 45242

Telephone: Office of Policy, Planning & Evaluation (202) 260-2680
NSCEP (800) 490-9198; Fax: 513 489-8695

Restrictions: None

Notes: This Guide must be obtained from NSCEP. It contains information on selected sources of environmental statistics from U. S. government agencies. This document responds to the need to help analysts, decision-makers, researchers, students, and others obtain policy-relevant environmental statistics and publications and locate experts who are knowledgeable about the data. This guide is a reference to national-level, time-series environmental statistics that are compiled and distributed by the U. S. government on a regular basis. It is a guide to statistical programs and the primary and secondary summary statistics they generate not a guide to raw data or databases. It is not intended to supersede information that can be obtained directly from the government agencies and is not an inclusive guide to U. S. environmental statistical programs, but one to selected programs that produce frequently sought- after, national-level statistics.

FAX: (616) 961-5305; DSN: 932-5305

Notes: This monthly product combines several Cataloging Handbooks. The H2 Federal Supply Classification (FSC) is a commodity classification system to help group and define supply items. The H3 DoD Ammunition Codes section provides a system of uniform, centrally assigned codes for generic descriptions of items classified as Ammunition and Explosives and Guided Missiles. The H4/H8 CAGE Codes section is a comprehensive name and address listing of manufacturers and non-manufacturer's worldwide who have done or are currently doing business with the government. The H5 Corporate Complex section shows the relationship between a corporate headquarters and its divisions, branches, subsidiaries, etc. It reflects the complete name and address of all related companies. The H6 Federal Item Name Directory provides item name data for the development and maintenance of item identification within the Federal Catalog System. The ACodP-2/3 is the NATO equivalent of the U.S. H2 and H6. The CD-ROM contains both the French and English translations of the ACodP-2/3. (1 disc)

Historically Black Colleges and Universities/Minority Institutions (HBCUs/MIs)

Originator: Executive Order 12677 28 April 1989

Order from: Defense Technical Information Center (DTIC) (See Appendix A)

Telephone: (703) 767-8235; DSN 427-8235

E-Mail: hbcu@dtic.mil

Notes: The intent of the Historically Black Colleges and Universities/Minority Institutions (HBCUs/MIs) program is to increase the opportunities to participate and benefit from federally funded programs. The Executive Order mandated agencies to increase the participation of Historically Black Colleges and Universities/Minority Institutions (HBCUs/MIs) in Federal programs by identifying and eliminating or reducing barriers. Guided by the Office of the Secretary of Defense, Office of Small and Disadvantaged Business Utilization the Defense Technical Information provides technical services to eliminate Scientific and Technical Information (STI) barriers. The program enhances HBCUs/MIs possibilities for winning DOD contracts and grants, as well as enhancing the academic environment at the undergraduate and graduate level. DTIC helps the DOD achieve these

HOW TO GET IT

Historically Black Colleges and Universities/Minority InstitutionsContinued

goals by providing unclassified unlimited documents at no cost, establishing networks for transferring information within the HBCUs/MIs/DTIC user community, identifying HBCUs/MIs R&D programs where DTIC can provide technical assistance, and promoting HBCU awareness and participation in the various potential defense contractors' programs in order to strengthen HBCUs/MIs abilities to compete and perform work under DOD R&D contracts.

Notes: Formerly Crew System Ergonomics Information Analysis Center CSERIAC. Human Systems IAC is the gateway to worldwide information on human systems integration in sea, land, air, and space environments. It provides a variety of scientific and technical information products and services to government, industry, and academia dealing with the human component of a system. Using a total system approach, emphasis is placed on the importance of optimizing total system performance and minimizing the life-cycle cost of ownership. The goal is to provide analyses, technologies and methods to ensure that personnel who operate, maintain, and support systems are properly selected, trained, and equipped to perform as effectively and safely as possible.

(703) 605-6000, 1-800-363-2068

Notes: IDA traces its roots to 1947, when Secretary of Defense Forrestal established the Weapons Systems Evaluation Group (WSEG) to provide technical analyses of weapons systems and programs. In the mid-1950s, the Secretary of Defense and the Chairman of the Joint Chiefs of Staff asked the Massachusetts Institute of Technology to form a civilian, nonprofit research institute. The Institute would operate under the auspices of a university consortium to attract highly qualified scientists to assist WSEG in addressing the nation's most challenging security problems. IDA is a nonprofit corporation whose purpose is to promote national security and the public interest and whose primary mission is to assist the Office of the Secretary of Defense, the Joint Staff, the unified commands and defense agencies in addressing important national security issues, particularly those requiring scientific and technical expertise. To avoid institutional pressures in support of Service positions, IDA does not work directly for the Military Departments. To ensure freedom from commercial or other potential conflicts of interest, IDA does not work for private industry or foreign governments. Many of their Core research items are available full text on the website.

Institute for National Strategic Studies (INSS)....Continued

Notes: The Institute for National Strategic Studies was established in 1984 by the Secretary of Defense as a focal point for analysis of critical national security policy and defense strategy issues. A component of the National Defense University, the Institutes programs and core missions include: Policy research and analysis and other support to the Joint Chiefs of Staff, the Office of the Secretary of Defense, the unified and specified military commands, and the other U.S. Government agencies in the development and advancement of U.S. defense and national security policy. Support to the educational missions of NDU, other professional military education institutions, and interagency training programs through the provision of regional and functional expertise and of state-of-the-art war gaming and simulation. Outreach activities, including an extensive program of publications and conferences. Many NDU Press publications (including all the Strategic Forum series, the annual Strategic Assessment, and many McNair Papers and ACT publications) are also available in fully searchable text on the NDU Home Page at <http://www.ndu.edu>

Restrictions: INIS registration required

Notes: INIS is the world's leading information system on the peaceful uses of nuclear science and technology. It has been operational since 1970. INIS maintains a database containing over 2 million bibliographic references to nuclear literature. It also maintains a collection of full-text non- conventional (grey) literature. One hundred one countries and 17 co- operating international organizations comprise the current membership. The INIS Database published on CD-ROM has a time span of 1970 to the present. INIS Atomindex files are available as are INIS Microfiche of Non- conventional literature cited in INIS from the INIS Clearinghouse. Interested parties should view the INIS Homepage for specific details of products and availability.

Joint Electronic Library

Originator: Joint Warfighting Center

Restrictions: Some security limitations. The primary users are the representatives of the combatant commands, the Services, the Joint Staff, and the joint education community. Secondary users include other commands, agencies, and individuals requiring access for other joint and service operations and activities.

Notes: The Joint Electronic Library (JEL) provides a high speed, full-text search and retrieval capability immediately accessible through desk top computers. It is a multi-user on-line full-text search and retrieval library and electronic mail and bulletin board system. Action officers, planners, warfighters, educators, students, and doctrine developers now have immediate access to current doctrine and tactics, techniques, and procedures available. The library consists of a series of databases containing: (a) Selected joint, service and combined publications. (b) Joint terminology. (c) Military education research papers. (d) Joint education curricula.

URL: http://www.dtic.mil/doctrine/site_map.htm

LD xxx xxx Logistics Document

Originator: Defense Logistics Studies Information Exchange (DLSIE)
U. S. Army Logistics Management Center
ATTN: ATSZ-DL
Fort Lee, VA 23801-6043

Order from: Some documents are available from:
Defense Technical Information Center (DTIC) (See Appendix A)

Cost: Yes

Forms: DTIC Form 1 or Form 55 for limited documents

Telephone: None available as of 1 May 1998

Restrictions: Available to DOD components other Federal agencies and DOD contractors and grantees with a certified need-to-know. DOD contractors and grantees must submit each request for microfiche in writing to the DOD activity sponsoring their grant or contract requesting that the sponsoring office endorse the letter and certify their need-to-know.

Notes: DLSIE was suspended indefinitely on 13 April 1998. Formerly, some documents were sent to DTIC for secondary distribution. DTIC super- imposed an AD number on these. (See entry under AD xxx xxx.) In the past the Logistics Document (LD) Index was included in the DOD Bibliography of Logistics Studies and Related Documents and often referenced the AD numbers.

Notes: The Marine Corps Directives/Orders Catalog (NAVMC 2671), has been replaced by a Web site. The site contains a listing and full text of all current directives and orders in the Marine Corps system. Marine Corps directives are issued as orders or bulletins. The former are issued until superseded or canceled and the latter have a self-cancellation date, usually less than six months from date of issue.

URL: <http://www.usmc.mil/directiv.nsf/web+orders>

Marine Corps Doctrine Manuals

Originator: Commandant of the Marine Corps
Headquarters, U. S. Marine Corps
Washington, DC 20380-1775

Order from: Electronic copies of all doctrine are available full-text online.

Notes: Doctrine Division has significantly revised the way Marine Corps doctrine is presented. The doctrine manuals are now organized into six categories as well as three levels of content. The levels of doctrine are Marine Corps Doctrine Publications (MCDP's), Marine Corps Warfighting Publications (MCWP's), and Marine Corps Reference Publications (MCRP's). MCDP's are higher order doctrine containing the philosophical underpinnings of the Marine Corps fundamental beliefs of warfighting. They will be published as MCDP's. When promulgated, MCDP's will supersede selected FMFM's. (For example, FMFM-1, Warfighting, when revised will become MCDP-1). Publications promulgated as MCWP's will contain the tactics, techniques, and procedures utilized by the Marine Corps in the prosecution of war or other assigned missions. When promulgated, MCWP's will supersede selected FMFM's and OH's. Also, in order to make doctrine more responsive to the needs of the operating forces, Marine Corps Order 5600.49 established a system of "proponents" who will assist in the writing and revision of MCDP's, MCWP's and MCRP's.

Determine whether your command has an Individual Activity Code (IAC). The IAC is what MCB Albany uses to mail out publications to units. Some units share these codes. If you don't have an IAC, you should contact Ms. Helen Stewart, HQMC, at DSN 224-2951 or Commercial (703) 614-2680. Ms. Stewart will advise you on how to obtain an IAC. If you do have an IAC, the Doctrine Division AO will put you on the distribution list using the IAC and you will receive copies of any manuals upon their release. If you have an IAC, you can also order the publications through MCPDs. MCPDs is a computer based distribution system run from Albany, GA. If instruction on the use of MCPDs is required, contact Ms. Diane Lewis at DSN 278-6035 or Commercial (703) 784-6035. If your unit does not have an IAC, you are from another service, or if you are a civilian, and in turn can not order publications through MCPDs, contact Ms. Jackie Bryan, HQMC, at DSN 224-1748 or Commercial (703) 614-1748. Ms. Bryan will be able to order.

Depending on unit size, the MCPDS/PL Clerk is usually found in the S-1. If it's a larger unit, they may be in the S-4. Since S-1 shops are concerned with the administrative side of operations, they may not realize that the same system that controls orders and bulletins can be used for ordering FMFM's, FMFRP's, Joint Pubs, NAVMC's Army's GTA's and FM's, Marine Corps and Army TM's etc.

All of the items stocked by Albany are ordered by using an eleven digit PCN (Publication Control Number). For example, NAVMC 2691, Marine Corps Drill and Ceremonies

HOW TO GET IT

Marine Corps Publications...Continued

Manual can be ordered using PCN 10001337900. (Note: Any item from this system is supplied at no cost to your unit]. If you do not know the specifics of a desired item, the PL system itself has a listing. You will need to utilize a microfiche listing-SL 1-2/1-3. Most MCPDS users will have that, but if they do not they should put themselves down for distribution. It comes out quarterly. SL 1-2 is a listing of technical pubs and the SL 1-3 lists everything else. (PCN 12100001000). The only thing "on paper" is MCBul 5600 "Marine Corps Doctrinal Publications Status" and should come out yearly in July. This has a complete listing of all current FMFMs, FMFRPs, and Joint Pubs, not to mention all of FMFMs, RPs under development. There have been changes within the numbering system. For instance, FMFM 10-1 "Communications" is now FMFM 3-30.

If you need to determine what is currently available, whether an item has been published yet, or help in identifying a manual you can also contact Doctrinal Division MCCDC, Quantico at DSN 278-4182 or Marine Corps University's Publications, DSN 278-2173. Neither of these sections furnish or mail publications but will assist in information on the system itself.

Marine Corps University Library....Continued

Notes: The mission of the Marine Corps University Library is to serve the students, faculty, and staff of the Marine Corps University as well as Marine Corps patrons throughout the world in their pursuit of excellence in academic and research projects. The library acquires, identifies, accesses, organizes, publicizes, and disseminates research information resources with its broadly-based multi-disciplinary collection of books, serials, on-line databases, and other non-print media. The library includes approximately 150,000 volumes, 600 periodicals, and 120,000 microforms. The collection is especially strong in the history of WWII.

Military Engineering Drawings Asset Locator System (MEDALS)

Originator: Defense Logistics Information Services (DLIS)
74 Washington Avenue, N
Battle Creek, MI 49017-3084

Order from: Originator (See Appendix A for complete ordering instructions)

Telephone: Information: (616) 961-4725/4068; DSN: 932-4725/4068

E-Mail: (information):disc-cso@disc.dla.mil

E-Mail: (order):aradford@disc.dla.mil

Notes: MEDALS is DOD's central locator system for engineering data stored by technical data repositories throughout the DOD. An interactive system, it indicates quickly and easily where engineering drawings reside and provide with the information and ability to obtain them fast, either by phone, mail, Fax:, E-mail:, or Online. With MEDALS, once you have located the information you need, you can order the data and download it in a matter of seconds if it is in a digitized format. If you have a large volume of query needs for engineering data, submit them to MEDALS in batch format directly on-line or through other multi-media (e.g. magnetic tape, cartridge, or floppy disk) and MEDALS will process your input request and return it within five working days. The information from the Navy Engineering Drawings Asset Locator System (NEDALS) has been incorporated into this system.

Notes: Automatic distribution of NASA-accessioned documents is available in one or more subject categories to NASA-registered users. For more information, call or write. Accession numbers containing the letter "N" indicate that the document is publicly available. The number following this letter is the year it was processed. For example, N(YR)-xxxx (N88-1001) was processed in 1988. Documents of Limited Significance (DLS) are assigned accession numbers in the 70,000 to 80,000 range. This series consists of older unclassified documents, documents not announced for administrative reasons, or documents of limited technical significance, which are catalogued, indexed, subject categorized, and included in the computerized data base but are not announced in an abstract journal. Selected documents may be microfiched and/or abstracted. This series is identified as the N70K series or the 7N series. Many of the reports accessioned by NASA may be borrowed from various cooperating libraries.

NASA Criss-Cross Directory of NASA "N" Numbers and DOD "AD" Numbers

Originator: Technical Information Services Division
NASA Lewis Research Center
21000 Brookpark Road
Cleveland, OH 44135

Order from: Chief, Library Branch (MS 60-3)
NASA Lewis Research Center
21000 Brookpark Road
Cleveland, OH 44135

Cost: Yes

Forms: Letter

Telephone: (216) 433-4000; Fax: (216) 433-5777

Notes: NOW OUT OF PRINT. Volume One, published in 1984, covers the period 1962-1978 and identifies AD numbers (DOD) to N numbers (NASA) as well as the NASA Research Report Series with their complementary N numbers. Volume Two covers the period 1979-1986 and updates the material previously published in Volume One. In addition, Volume Two lists the N numbers to AD numbers for the entire period of 1962-1986. Because of the number of pages, Volume Two has been published in two parts (Part 1, pp. 1 to 450; Part 2, pp. 451 to 897). Limited supply available. Information of this nature is now available on NASA/RECON Select and DTIC's STINET databases.

NASA RECON Plus Database....Continued

Notes: RECONplus is the primary online data retrieval system to the NASA Scientific and Technical Information databases. These five databases contain bibliographic citations to worldwide aerospace related information on aeronautics, astronautics, chemistry and materials, engineering, geosciences, life sciences, mathematical and computer sciences, physics, social sciences, and space sciences, published from 1915 to the present. This database includes all the citations from NASA's STAR (now discontinued) and International Aerospace Abstracts, as well as references to classified or limited documents, the Space Commercialization Database, Directory of Numerical Databases, the unclassified DTIC TEAMS, NASA RTOP's, NASA Contract File and the NACA Historical File. It provides worldwide coverage of materials of interest to the aerospace community. Database Access available from: Searches are run upon request NASA CASI and the NASA Technology Transfer Centers and for the general public by NTIS. The Aerospace Database is available to the general public through Dialog.

HOW TO GET IT

National Academy of Sciences (NAS) Publications....Continued

Restrictions: DTIC services are restricted to registered users only. Classified NAS publications must be ordered through channels with certification of need-to-know.

Indexed in: National Academy of Sciences Annual Report Books in Print

Notes: NAS was established by Congressional charter to consider questions referred to it by the Government, but it is not a government agency. Sections of the Academy represent branches of scientific research, such as the Institute of Medicine and the National Academy of Engineering (NAE). The National Research Council (NRC) is the governing board, which administers the business of the Academy. Committees and boards are established from time to time to perform specific missions and then go out of existence. NAS publications are similar to contractor reports. Some are available only through the originating committee or board (these generally are in short supply); others from the sponsoring government agency (who might send them to DTIC or NTIS); and still others (commercial trade items) from the National Academy Press.

E-Mail: Distribution@noaa.gov

Notes: NACO continuously collects topographic and aeronautical data from a large number of sources. NACO uses this source data to compile and maintain the charts and products provided to the aviation community. The most commonly referred to sources of topographic data include: United States Geological Survey topographic maps, state and local government maps, private sector atlases and maps, railroad atlases, and marked-up charts from power-line companies. The most commonly referred to sources for aeronautical information include: FAA published data from the National Flight Data Center (i.e. airport, NAVAID, obstruction, control tower, airspace, airway, and other critical aeronautical data), obstacle and communications data from the Federal communications Commission (FCC), and data collected through the NACO Flight Edit Program (an NACO/NOAA Corps collaborative effort to perform aerial surveys and flight check NACO products). In addition, NACO originates its own critical source data in support of its products, and assigns Government accuracy codes to the data for use by the military and the aviation public. NACO also prints and distributes all NOAA nautical charts and related products, as well as National Imagery and Mapping Agency (NIMA) public sale aeronautical and nautical charts; and maps compiled by the National Weather Service.

Notes: The National Defense University Library is located in George C. Marshall Hall on Ft McNair, Washington DC. The Library's collections consist of more than 500,000 bound volumes, pamphlets, periodicals, A-V materials, microforms, and government documents, and classified documents. The library is a readily available source of information on the theory and conduct of national security affairs, international relations, management, and mobilization of resources. The Library is organized into Technical Services, Research and Information Services, Special Collections, Archives and History, Collection Development and Systems. The book collection emphasizes history and the social sciences, management, and military art and science. The Library's Special Collections, Archives, and History Branch is the repository for personal papers, rare books, academic history materials, student papers,

HOW TO GET IT

National Defense University Library....Continued

historical photographs, maps, prints, and artifacts. The manuscript collection contains primarily the personal papers of twentieth-century military leaders, with emphasis on those of former Chairmen of the Joint Chiefs of Staff. The collection of 1,400 current periodicals is complemented by access to over 4,000 electronic journals. Five multidisciplinary online search services are available to students and staff.

Fax: (301) 926-3696

Notes: An agency of the U. S. Department of Commerce's Technology Administration, NIST's primary mission is to promote U. S. economic growth by working with industry to develop and apply technology, measurements, and standards. It carries out this mission through a portfolio of four major programs: Measurement and Standards Laboratories; an Advanced Technology Program; a grassroots Manufacturing Extension Partnership with a network of local centers, and a quality outreach program associated with the Malcolm Baldrige National Quality Award that recognizes continuous improvements in quality management by U. S. manufacturers and service companies. NIST supports the development of voluntary industry standards. Federal Information Processing Standards (FIPS) are developed only when there are no existing voluntary standards to address Federal requirements for the interoperability of different systems, for the portability of data and for computer security. Information about Voluntary industry standards can be obtained from the American National Standards Institute (ANSI) which operates the National Standards System Network (NSSN). To access, open the NSSN World Wide Web site at <http://www.nssn.org>.

Office of Wastewater Management: Catalog of Publications (Report No: EPA830B96001),

Office of Wastewater Management Catalog of Publications (Report No: EPA832B97005),
Office of Wetlands, Oceans and Watersheds 1993 Publications List (Report No: EPA840B93002). The EPA publications numbering system was designed in 1991 to provide easier identification, tracking and dissemination of publications. Each publication number identifies the responsible organization producing the publication, a specific office/division within the organization, an alpha descriptor of the document type, calendar year in which the publication was produced, and the sequential number identifying how many of that type of publication were produced within that particular organization during the calendar year.

Naval Air Warfare Center Technical Reports

Order from: Naval Air Warfare Center
Weapons Division
Technical Library, 4TL000D
China Lake, CA 93555-6100

Naval Air Warfare Center
Aircraft Division
Building 407, Central Library
Patuxent River, MD 20670-1120

Telephone: Information Weapons Division (760) 939-3389; FAX (760) 939-0606
Aircraft Division (301) 342-1927/3643

Restrictions: Interlibrary loan only.

Notes: In 1991, the Navy began consolidating its technical capabilities to improve its products and services, resulting in the creation of four large warfare centers. One of these, the Naval Air Warfare Center (NAWC), located in Washington, D. C., has integrated sites and capabilities to improve services to the fleet and sponsors. NAWC streamlined its resources into two divisions: the Aircraft Division located at Patuxent River and the Weapons Division at China Lake, Calif. The standup of the NAWC Aircraft Division at Pax River took place on January 1, 1992, thus began its role as the Navy's full spectrum research, development, test and evaluation (RDT& E), engineering and fleet support center for air platforms. The NAWC Air-craft Division integrated the Naval Air Test Center along with the Naval Air Development Center, Warminster, Pa. Naval Air Engineering Center, Lakehurst, N. J. Naval Air Propulsion Center, Trenton, N. J. and the Naval Avionics Center, Indianapolis.

Naval Postgraduate School Dudley Knox Library

Originator: Dudley Knox Library
Naval Postgraduate School
411 Dyer Road
Monterey, CA 93943-5002

Telephone: (831) 656-2485; DSN: 878-2485 FAX: (831) 656-2842

E-Mail: refdesk@nps.navy.mil

Restrictions: Circulation of materials limited to active duty and retired military personnel and DOD personnel employed by NPS only.

Notes: The Dudley Knox Library is a university library which is unique within the community of academic libraries in that it is dedicated both to supporting research and graduate-level education and providing for the special requirements of the Naval Postgraduate School, such as the Joint Professional Military Education (JPME) Program. In addition to its open-literature collections in the disciplines of science, engineering, national security affairs, and administrative sciences, the Library houses a collection of classified (Secret/ Confidential) research reports. Presently, the Library's holdings number approximately 450,000 bibliographic volumes in hard copy, 1,500,000 volumes in microform, and 1370 journal subscriptions. A staff of 32 librarians and library support personnel identify and process materials for the collection, and assist members of the campus community and the public to find information resources useful for their work. Library space now totals approximately 100,000 square feet. The Library has developed a map collection in support of the curriculum. The Christopher Buckley, Jr., Collection of books on naval and maritime history includes both fiction and nonfiction. The Library is a selective depository for information distributed through the Federal Depository Program. The Library is a member of the Monterey Bay Area Cooperative (MOBAC) Library System which provides expedited interlibrary loan among its members. The Library also participates in the Online Computer Library Center (OCLC)'s interlibrary loan program, which facilitates library borrowing of materials throughout the U.S.

DD 1425
DD 1149

Telephone: (215) 697-2626; DSN442-2626

Indexed in: NAVSUP 2003

Notes: The stock number is 0910-LP-100 4103. The NAVSEA Technical Manual Identification Numbering System (TMINS) has been promulgated to initiate the implementation of a single significant numbering system for technical manuals procured by NAVSEA. The use of the single numbering system will eliminate the confusion that now results from the different numbering systems in use by the former Naval Ships and Navy Ordnance Commands. The Guide has two purposes: (1) to explain the concepts of the TMIN system and the composition of the TMINS number, and (2) to provide the necessary data for proper application of TMINS numbers. The Guide is divided into four sections: Sect. I provides the explanation of the system and the composition of the number. Sect. II presents the TMINS application data in the form of alpha-numeric codes and code groups. Sect. III summarizes by means of a definitive form, the system, equipment and project-related information necessary for proper assignment of a TMINS number. Sect. IV is an alphabetical index of subjects and commodities within the purview of the TMINS system.

HOW TO GET IT

Navy Forms Online....Continued

Notes: Not all Navy forms are available. Each command or activity may issue its own forms for its own use. Generally, these forms are available only from the offices which issue them. The Introduction to NAVSUP 2003 should be read before trying to locate stock numbers. It includes precise instructions as to how to locate and order the forms needed, and provides excellent cross-references from other series and originator numbers. Contractors should check for specific instructions shown under the forms needed, e.g., Department of Defense Forms (DD Forms). The Introduction also includes a list of all the distribution points for forms. The entire index of Navy COG II forms can be ordered by customers on a single CD. This process allows the customers to download and fill in the order form online. The order form can be mailed, faxed or emailed to the Forms Manager. The mail and fax information is provided on the form.

Naval Potential Contractors Program (NPCP)

Notes: Formerly called Navy Potential Contractor Program (NPCP) and Navy Acquisition. The Naval Potential Contractor Program (NPCP) provides an approved means for the interchange of controlled information between Department of Defense (DoD) activities and researchers from qualified firms, universities, and other non-government organizations. Through the NPCP, access is allowed to documents at the Navy Acquisition, Research and Development Information Center (NARDIC), within the Office of Naval Research. Information is also available from other Naval and defense activities. This program is designed for both potential contractors and current DoD contractors seeking information in areas not covered by contracts. Specifically, the NPCP provides access to classified and unclassified scientific and technical information concerning Naval needs, requirements, programs, accomplishments, advance planning, and funding associated with research, development, test and evaluation.

Nondestructive Testing Information Analysis Center (NTIAC)

See Also: Information Analysis Centers (IAC)

Originator: Texas Research Institute-Austin
415A Crystal Creek Drive
Austin, TX 78746-6201

Order from: Originator

Cost: Yes

Telephone: General Information (512) 263-2106; Fax: (512) 263-3530

Notes: NTIAC capabilities cover the full spectrum of Nondestructive Testing (NDT), Nondestructive Evaluation (NDE), and Nondestructive Inspection (NDI), utilizing techniques and processes involving material-energy interaction phenomena to detect flaws and/or characterize materials, components, structures, or entire systems. Radiographic, holographic, acoustic, magnetic and other related phenomena are within the NTIAC scope. The use of nondestructive sensors for manufacturing and materials process control, and for intelligent or adaptive control applications, is also within the purview of NTIAC. Other information of concern to NTIAC includes economic aspects of the NDE industry, economic considerations with respect to selection of techniques and processes; industry trends in applying current NDE technologies in research and development, production, maintenance, safety monitoring, failure prevention of in-service material, and life assurance. As a national resource of NDT/NDE/NDI technology, NTIAC will provide fast reaction time to service inquiries for analysis, especially where field and military systems are involved or where potential failure or quality situations may arise. In addition to providing customized literature searches on NDT/NDE/NDI, NTIAC has a variety of state-of-the-art reports available on specialized NDE topics and copies of conference proceedings for NDE Symposia held in San Antonio since 1969. NTIAC receives guidance from the Tri-Service Nondestructive Testing Steering Committee and supports the Committee on Materials (COMAT) Working Group on NDI/E.

North American Industry Classification System (NAICS)

Order from: National Technical Information Service (NTIS) (See Appendix A)

Bernan Press
4611 F Assembly Drive
Lanham, MD 20706-4391

Cost: Yes

Telephone: NTIS (See Appendix A)
Bernan: 1-800-865-3457; Fax: 1-800-865-3450

E-Mail: order@bernan.com

Notes: Adopted by the Office of Management and Budget in 1997, NAICS is the first-ever industry classification system for all of North America. It replaces the decades old SIC, last updated in 1987. It includes over 350 new industries, tables showing correspondence between NAICS and SIC codes, a comprehensive index of industries and their Codes, and a directory of NAICS-involved agencies. Available in print or on CD-ROM.

URL: <http://www.census.gov/pub/epcd/www/naics.html>

North Atlantic Treaty Organization (NATO) Documents

See Also: Advisory Group for Aerospace Research and Development (AGARD) Publications

Order from: Chief, Central U. S. Registry
3072 Army Pentagon
The Pentagon, Rm. 1B889
Washington, DC 20310-3072

Cost: No

Forms: Letter

Telephone: CUSR (703) 697-4204/6432; DSN 227-5943/6432
Fax: (703) 693-0585; DSN 227-0585

Notes: Classified and Unclassified NATO Documents should be ordered from the Central U. S. Registry (CUSR) or from U. S. NATO Subregistries who are established to support U. S. Government elements and Contractors worldwide. Contractors requesting NATO classified documents must have a Defense Security Services (DSS) or other Agency facility clearance (FSC or Cage #), have personnel NATO-briefed, and have a NEED-TO-KNOW and/or NATO contract. Contractors must have their requests verified by their contract monitors prior to submission to a U. S. NATO Subregistry or the Central U. S. Registry, Rm. 1B889, Army Pentagon, Washington, DC 20310-3072. CUSR does not presently maintain an index of all documents published by

HOW TO GET IT

North Atlantic Treaty Organization (NATO) Documents....Continued

Headquarters, NATO or in the CUSR inventory. A need-to-know, storage capability, security clearance, and NATO- briefing are required to obtain NATO classified documents. NATO documents must be ordered through U. S. NATO Registry channels. For requesting NATO documents, the following is essential: NATO short title (i.e. AC, MC, etc.), date, originator, and if known, classification and subject/title. CUSR is the sole U. S. Depository for NATO documents and maintains copies on microfilm of the majority of NATO documents issued by Headquarters, NATO since its establishment in 1949. CUSR will request from NATO originators any document not held by the CUSR. Contact your NATO Control Officer, Security Manager, Classified Document Custodian, Contract Monitor, DIS representative, etc. or the CUSR for information about the U. S. NATO Subregistries. Contact the CUSR for information regarding NATO documents, organizations, Registry System, etc.

North Atlantic Treaty Organization (NATO) Reports (Except AGARD)

See Also: Advisory Group for Aerospace Research and Development (AGARD) Publications

Originator: North Atlantic Treaty Organization (NATO)
NATO Headquarters
B-1110 Brussels, Belgium

Order from: Classified NATO Reports must be ordered from a NATO Subregistry, such as: Department of Defense OSD Subregistry Pentagon, Room 3A948 Washington, DC 20310 The Defense Technical Information Center (DTIC) is also a subregistry. Contractors must send their requests through their contract monitors (for certification of need-to-know), through their cognizant Defense Contract Administration Services Region (DCASR) offices (for certification of NATO clearances and storage capability), and to the NATO Subregistry. Unclassified NATO reports are frequently labeled NATO Furnished and are usually available to registered users from: Defense Technical Information Center (DTIC) (See Appendix A)

Forms: Letter

Telephone: OSD Subregistry (703) 697-6395; DSN 697-6395

Restrictions: Certification of need-to-know and of storage capability is required. NATO reports must be ordered through channels.

Notes: NATO classified reports are designated: AC-xxxx/xx

NTIS Army Publications Program

Order from: National Technical Information Service (NTIS) (See Appendix A)

Notes: Under an agreement with the Army, NTIS will fill orders for Army Publications. This will allow the Army to better handle its own primary distribution and let NTIS assist the general public in obtaining Army Publications in a more timely and efficient manner. Because of the active nature of the Army document inventory, many manuals are now obsolete. Others are restricted and available to the U. S. Government only. NTIS needs the Army Publication number when ordering. Army titles can be searched on the NTIS Website.

HOW TO GET IT

Office of Scientific Research and Development/National DefenseContinued

Indexed in: Summary of Technical Report of NDRC, Master Subject Index
Summary Technical Report of NDRC, Microfilm Index

Notes: OSRD has been disbanded. The basic set of Summary Technical Reports in this series consists of 68 volumes, organized in 19 divisions, panels and committees. There are hundreds of back-up and contractor reports which do not appear in the Summary Technical Reports. Both the Summary Technical Reports and the contractor reports are available from several sources. The National Archives and Records Service seems to have a complete set, but the paper copy and microfilm reproductions from NARS are expensive. Until 1962, the OSRD/NDRC reports sent from DTIC to NTIS automatically were forwarded to the Library of Congress. After that date, reports received from DTIC were retained at NTIS. Therefore, an incomplete set (some in hard copy, some in microform) can be found at LC, and some volumes, such as the Catalog of OSRD Reports, Division 6, Sub- Surface Warfare (AD 621 339) are available from DTIC for registered users and NTIS. The following abbreviations refer to Panels and Committees of NDRC:

Official Gazette of the United States Patent and Trademark Office....Continued

Notes: The Official Gazette of the United States Patent and Trademark Office is the official journal relating to patents and trademarks. It has been published weekly since January 1872 (replacing the old "Patent Office Reports"), and is now issued each Tuesday in two parts, one describing patents and the other trademarks. It contains a claim and a selected figure of the drawings of each patent granted on that day; notices of patent and trademark lawsuits; indexes of patents and patentees; list of patents available for license or sale; a list of Patent and Trademark Depository Libraries (PTDLs); and much general information such as orders, notices, changes in rules, changes in classification, etc. The Official Gazette is sold on subscription and by single copies.

Notes: In 1959, the Bureau of Ordnance (Navy) became the Bureau of Naval Weapons and the designation for this series was changed to WD. In 1966, the Bureau of Naval Weapons split into the Naval Ordnance Systems Command (now Naval Sea Systems Command) and the Naval Air Systems Command. Naval Sea Systems Command retained the WD-designation for its series. Naval Air Systems Command retained the WD-designation for some publications in the series, but as they are being revised they are reissued in the AR-series. As of 1980 NAVSEA dropped the WD-designation and reverting to the OD-designation for the series.

Telephone: (937) 255-4840; DSN 785-4840; Fax: (937) 255-9673

E-Mail: crosthwaite_kevin@bah.com

Notes: SURVIAC is the DOD focal point for non-nuclear survivability and vulnerability data, information, methodologies, models and analysis relating to U. S. and foreign aeronautical and surface systems. SURVIAC's scope covers the survivability of friendly systems to threat weapons and the effectiveness of U. S. weapons against foreign systems. Non-nuclear weapons include conventional missiles and guns, directed energy weapons, and chemical/biological weapons. Data holdings in the weapons area include, as applicable, acquisition, detection, tracking, launch, fly-out and fuzing characteristics, the countermeasures and counter-countermeasures employed, and terminal effects. Weapon systems include fixed and rotary-winged aircraft; both manned and unmanned, missiles, tanks, trucks, armored personnel carriers, artillery, etc. Data holdings for systems include physical and functional characteristics; design, performance and operational information; acoustics, infrared, optical, electro-optical and radar signatures; combat damage and repair, and system, subsystem, and component probability. SURVIAC is sponsored by the Joint Logistics Commanders' Joint Technical Coordination Groups on Aircraft Survivability (JTCG/AS) and Munitions Effectiveness (JTCG/ME). SURVIAC was established December 21, 1984.

Telephone: (619) 545-7529; DSN: 735-7529; FAX: (619) 545-0019

Restrictions: No registration required.

Indexed in: Self-indexed; Browse

Notes: Forum to query DOD SBIR solicitation topic authors or POCs on related technical issues. Both questions and answers are posted for all SBIR participants; usually within seven days. In addition, DOD information and changes, when obtained are available here. A browsable link to DTIC's Online Technical Information Package System (OLTIPS) accesses a bibliographic listing of technical reports from DOD-funded work in related areas. Document delivery options are provided for some DOD Topic References. As each new SBIR solicitation becomes available, new topics replace the previous one.

E-Mail: crosthwaite_kevin@bah.com

Notes: SURVIAC is the DOD focal point for non-nuclear survivability and vulnerability data, information, methodologies, models and analysis relating to U. S. and foreign aeronautical and surface systems. SURVIAC's scope covers the survivability of friendly systems to threat weapons and the effectiveness of U. S. weapons against foreign systems. Non-nuclear weapons include conventional missiles and guns, directed energy weapons, and chemical/biological weapons. Data holdings in the weapons area include, as applicable, acquisition, detection, tracking, launch, fly-out and fuzing characteristics, the countermeasures and counter-countermeasures employed, and terminal effects. Weapon systems include fixed and rotary-winged aircraft; both manned and unmanned, missiles, tanks, trucks, armored personnel carriers, artillery, etc. Data holdings for systems include physical and functional characteristics; design, performance and operational information; acoustics, infrared, optical, electro-optical and radar signatures; combat damage and repair, and system, subsystem, and component probability. SURVIAC is sponsored by the Joint Logistics Commanders' Joint Technical Coordination Groups on Aircraft Survivability (JTCG/AS) and Munitions Effectiveness (JTCG/ME). SURVIAC was established December 21, 1984.

U. S. Air Force Historical Research Agency (AFHRA) Documents

Originator: U. S. Air Force Historical Research Agency

Order from: U. S. Air Force Historical Research Agency
600 Chennault Circle
Maxwell AFB, AL 36112-6424

Cost: Yes

Telephone: Customer Service: (334) 953-5834;
DSN 493-8830;
Fax: (334) 953-7428

E-Mail: afranews@maxwell.af.mil

Notes: The USAF Historical Research Agency, co-located with the Air University Library at Maxwell Air Force Base, is a principal repository for Air Force historical documents. The Agency's holdings, exceeding 60 million pages, represent the largest and most valuable specialized collection of historical documents on U. S. military aviation in the world. Materials range from the use of balloons in the Civil War through the record of Air Force activities in World War II, Korea, Vietnam, Operations DESERT SHIELD/DESERT STORM and the Balkan Air Campaign. About three-fourths of the documents are U. S. Air Force unit histories submitted from 1942 to the present. Special collections, some dating from the early 1900's, complement the unit histories. Among them are historical monographs and studies written by Air Force historians; more than 2,000 oral history interviews; end-of-tour reports of major overseas commanders; course materials of the Air Corps Tactical School from the 1930's; and working papers of key Army Air Forces staff offices, the British Air Ministry, and German Air Force during World War II. More than 500 collections of personal papers of key, retired Air Force civilian and military officials are also available to researchers. Additionally, 16mm microfilm copies of unclassified materials in the collection can be purchased by special order. Except for documents that are classified or otherwise restricted, the collection is open to the public, and visitors are welcome.

U. S. Navy Public Works Center, Norfolk, VA

Originator: Public Works Center Regional Engineer
Program Management Building A-81
9742 Maryland Avenue
Norfolk Naval Station, VA 23511-3095

Order from: Originator

Telephone: Public Affairs: (757) 445-8732

Notes: The regional Navy Public Works Center (PWC) in Norfolk, VA is the oldest and the largest of the Navy's Public Works centers. It was founded in June of 1948. It is the single provider for all facilities and environmental services throughout the five-state Mid-Atlantic region. Other Navy public works centers are in Great Lakes, IL; Jacksonville, FL; Pearl Harbor, HI; Pensacola, FL; San Diego, CA; Washington, DC; Yokusuka, Japan, and Guam. Regional collections of engineering drawings are maintained in the centers. These repositories contain original construction engineering drawings and derivative drawings. When a Center is closed the original engineering drawings are sent to National Archives regional locations. The PWC, San Francisco Bay closed in September of 1997. Currently, the original engineering drawings have been sent to the National Archives, Pacific Sierra Region in San Bruno, CA.

E-Mail: thompskl@acq.osd.mil

Notes: Support includes the following programs: The Defense Sciences (DRS) Program is the

Long-standing core research program of the Department of Defense. DRS is the largest single source of DOD research funding for universities. The University Research Initiative: The goal of this program is to strengthen the capabilities of the nation's universities to perform multidisciplinary research; educate scientific and engineering personnel, and enhance new technologies critical to a strong U. S. Defense economy. The University Research Initiative (URI) is one of the many DOD university programs supported by the Defense Technical Information Center. The URI Program is funded by the Office of the Secretary of Defense. It is designed to improve the quality of research performed at universities to meet Defense needs; provide expanded opportunities for interaction between universities and the DOD research community; and support fellowships and traineeships in science and engineering disciplines important to national defense. For more information regarding participation in the University Research Support Program, contact Keith Thompson via e-mail: thompskl@acq.osd.mil

X(YR)-xxxxx NASA Accession Number for Classified or Limited Reports

See Also: NASA Center for AeroSpace Information (CASI)

Originator: Various NASA offices, government agencies, and industrial organizations publishing limited distribution reports of interest to the aerospace community.

Order from: NASA Center for AeroSpace Information (NASA CASI)
7121 Standard Drive
Hanover, MD 21076-1320

Forms: NASA Order Blank (Form 492)

Telephone: Document Requests (301) 621-0390; (410) 712-0272
Registration (301) 621-0153 Fax: 301-621-0134

E-Mail: help@sti.nasa.gov

Restrictions: Available to NASA registered users only. Call or write for further information.

Notes: Accession numbers containing the letter "X" indicates that the document is security classified or has limited distribution. The number following this letter indicates the year the document was processed. For example, X88- 10001 was processed in 1988. NASA-supported documents with distribution limitations are announced in the X10,000 series and generally carry an accession number of X(YR)-10001 and up. Documents of Limited Significance-Limited Distribution (DLSLD) are assigned accession numbers in the 70,000 to 79,000 range. This series consists of current non-NASA documents that are security classified or have administrative limitations or both. They are cataloged, indexed, subject categorized, and entered into the computerized database, but are not announced in an abstract journal. Selected documents may be microfiched and/or abstracted. This series is identified as the X70K series or the 7X series.

Notes: RUSH Service (available for an additional fee). Online ordering NTIS OrderNow® is a free service which allows you to locate and order online the most recently added products in the NTIS collection. OrderNow provides secure ordering for orders charged to a credit card or and NTIS Deposit Account. NTIS accepts payment by credit card, check or money order, or charged to an NTIS Deposit Account. Checks and money orders should be payable to NTIS in U. S. dollars drawn on a U. S. bank, an international bank with a U.S address on the check; or a Canadian bank. We can also bill your organization for an additional fee. A request to be billed must be on a purchase order or company letterhead.

Orders shipped to international destinations are subject to international prices. Airmail Fees Canada and Mexico add \$4 per item. Other countries add \$8 per item. NTIS Handling Fee is \$5 per total order for delivery to any location in the United States, Canada, or Mexico. Orders outside of North America carry a handling fee of \$10 per total order. Handling Fee does not apply to RUSH Service, SRIM, Subscriptions, and orders picked up at the NTIS Bookstore in Springfield, VA. Documents downloaded directly from the NTIS Web site are exempt from the handling fee while all other documents ordered from the NTIS Web site are subject to the handling fee. Additional Information: In addition to demand sale items and regular subscription service, NTIS also provides Ongoing Subscription Service for selected products. This service provides revisions and/or updates on a continuous but irregular basis. To begin Ongoing Subscription Service, please submit your request in writing. Include your NTIS deposit account number, payment to establish an NTIS Deposit Account, or authorization to charge a major credit card. For questions about Ongoing Subscription service, call the NTIS Subscriptions Department at 1-800-363-2068 or (703) 605-6060.

Ordering Through Online Services: You can order NTIS products online through GOV.Research_Center, <http://grc.ntis.gov>; DATA-STAR (Dialog Corporation), DIALOG, and

APPENDIX C: TopicLinks

NOTE: TopicLinks is a gateway to scientific and technical information web sites primarily from the US Government. The main list of topics is based upon DTIC's Field and Group Structure. Under each topic you will find links that can lead you to online publications, databases and web sites with reliable government information. The sites assist and direct you to other locations and sources of information on that topic available on the Internet.

The Defense Technical Information Center has identified 25 broad subject fields and 251 groups to categorize the areas of scientific and technical interest. These fields and groups provide the structure for the subject grouping of technical reports in DTIC's collection. To access the Web site go to: <http://www.dtic.mil/dtic/subcatguide/index.html>
